Biography

With over 42 years in early childhood education, I have served as a teacher, Kindergarten Head of Section, Principal, and now Early Years Consultant. My passion lies in creating a supportive learning environment that prepares children for meaningful life experiences.

Throughout my career, I have developed and managed Kindergarten sections in two schools and helped establish a Nursery, leading curriculum design and programs. Collaborating with dedicated educators, I've fostered a nurturing space for young learners. I've also contributed significantly to inclusion programs for students with determination and learning disabilities. My leadership has been instrumental in achieving consistently good provisions for children in Kindergarten, as highlighted in KHDA reports, creating a happy learning environment where children are engaged and excel.

I believe that each child is unique and has the potential to succeed. The key is to meet them at their level, discover their strongest learning modalities, and connect learning to their lives and experiences. I strive to help children realize they are deserving of love and respect and that they are capable of achieving anything they set their minds to. The reward is being part of this wondrous journey.

I look forward to collaborating with DIPS parents, staff, and the community to ensure children receive the highest quality education. Let's create a supportive learning environment where every child can shine!
